SUMMARY

Founder-engineer and full-stack builder with 7+ years shipping AI-powered products from 0 to 1, pairing hands-on engineering with product ownership and direct client work. Co-founder of Pragma AI, a B2B consultancy building tailor-made AI solutions (conversational agents, RAG "company brains," and process automation) that run on client data. Previously built and exited Eugenia.ai (PropTech; 20+ buildings, 10,000+ users) and scaled Online Basics to $8M USD in revenue on LLM-powered workflows and automated data pipelines. Targeting an Applied AI / forward-deployed role building AI products and internal tooling that deliver measurable value.

EXPERIENCE

Online Basics Company Feb 2020 – Nov 2025
Founder & CEO *Mexico City, MX*

- Designed an LLM workflow on the Anthropic API with custom prompt engineering and a multi-stage validation pipeline to generate and optimize 100+ product listings per month with competitor analysis and SEO, cutting content-creation time by 70% across Amazon and Mercado Libre.
- Built a cloud microservices architecture (Python on Heroku, AWS databases) orchestrating 10+ third-party APIs to process 100K+ daily data points with hourly sync, reducing manual reporting from hours to minutes.
- Engineered internal analytics and data pipelines to validate product-market fit, monitor unit economics, and drive real-time pricing and inventory decisions, scaling to $8M USD revenue with a lean 9-person team.
- Led a 9-person team with git-based workflows, code reviews, and agile delivery; established incident-response and data-validation systems that cut data-entry errors by 90%.

Eugenia.ai Jul 2018 – Jan 2020
Founder & CEO *Mexico City, MX*

- Took a building-management SaaS from concept to acquisition in 18 months, deploying to 20+ buildings (B2B clients) and 10,000+ users, with onboarded buildings reaching 75% resident adoption within 90 days.
- Owned the full product lifecycle and led client deployments: onboarding HOAs and property administrators on-site, gathering requirements, and translating complex, conflicting needs into intuitive mobile and web apps.
- Co-built the full-stack platform (React front-end, Node.js back-end on AWS) with QR-based access control, real-time communication, and fee and parcel management, reducing manager workload by 40%.
- Bootstrapped to profitability within 12 months without raising external capital.

Nextia.mx Mar 2017 – Oct 2018
Mobile & Front-End Developer *Mexico City, MX*

- Developed and maintained iOS (Swift) and Android (Java) apps used by 50,000+ users, ensuring feature parity and performance across platforms.
- Built responsive React and JavaScript web apps, improving load times by 40% through code optimization and asset compression, and integrated REST APIs to sync front-end and back-end data, reducing user-facing errors by 90%.

PROJECTS & CONSULTING

Pragma AI *Co-Founder · 2026–Present*
Co-founded a B2B AI consultancy delivering tailor-made AI solutions to Mexican SMBs. Built "Pragma Brain," a Retrieval-Augmented Generation (RAG) "company brain" that ingests a company's internal data to answer questions and auto-generate business reports, productized as the firm's flagship offering. Ship conversational AI agents and internal automations for quoting, reporting, onboarding, and collections, and run client diagnostics.

Personal-Finance AI Agent: Pragma AI *2026*
Built an autonomous agent with tool-use / function calling (Hermes agent framework) that tracks and categorizes spending, summarizes activity and spending trends, and answers natural-language money questions.

Texas Ribs, E-Commerce UX Consulting *2026*
Audited the "Ordena en Línea" online-ordering flow for a restaurant chain, benchmarked it against best-in-class food e-commerce, and delivered a prioritized UX-improvement report to lift conversion.

SKILLS

AI & LLM: Anthropic API, Prompt Engineering, AI Agents (Tool-Use / Function Calling), RAG, Embeddings & Vector Databases, LLM Workflow Automation, AI-Assisted Content Generation
Software & Cloud: Python, JavaScript, TypeScript, Node.js, React, Swift, Java, SQL, NoSQL, REST APIs, AWS (EC2, RDS), Firebase, Heroku, Docker, Git
Product & Collaboration: 0-to-1 Product Development, MVP Scoping, Roadmapping, Stakeholder & Client Management, User-Centric Design, Agile, Team Leadership (9+)

EDUCATION

Universidad Iberoamericana: Bachelor of Engineering in Chemical Engineering
Certification: AI Fundamentals for Non-Data Scientists, University of Pennsylvania (2026)
Languages: Spanish (Native), English (Fluent)
