SUMMARY

Serial entrepreneur with 7+ years building and scaling tech-enabled businesses from concept to acquisition and multi-million dollar revenue. Founded Eugenia.ai, a PropTech platform serving 20+ buildings and 10,000+ users, bootstrapped to profitability and successfully acquired within 18 months. Led Online Basics, a data-driven e-commerce operation that raised $500K+ from investors and banks, generating $8M USD in revenue over 2 years through AI-assisted workflows and lean operations. Proven track record in capital efficiency, business model validation, fundraising, and building scalable systems that bridge technical capabilities with business outcomes in fast-moving markets.

PROFESSIONAL EXPERIENCE

ONLINE BASICS COMPANY **Feb 2020 – present**
FOUNDER & COO MEXICO CITY, MX

- Raised over $500,000 USD from private investors and banking partners to strategically fund inventory expansion, automate core workflows, and scale the operations team—demonstrating ability to secure and deploy capital efficiently
- Generated $8M USD in revenue over 2 years by building a lean, data-driven operation with AI-assisted workflows, integrated logistics systems, and automated catalog management across multiple marketplaces
- Built end-to-end automated systems to efficiently list and optimize 100+ SKUs monthly across major e-commerce platforms, reducing manual effort by 70%+ while maintaining quality and performance
- Designed internal analytics infrastructure leveraging custom scripts and data pipelines to validate product-market fit, monitor unit economics, and make real-time decisions on inventory allocation and pricing strategy
- Scaled operations with minimal headcount by systematically automating repetitive tasks and integrating cross-platform tools, achieving over $500K revenue-per-employee annually through operational excellence

EUGENIA.AI **Jul 2018 – Jan 2020**
FOUNDER & CEO MEXICO CITY, MX

- Bootstrapped to profitability within 12 months and completed successful acquisition by implementing lean operational excellence, strategic value creation, and capital-efficient growth, without raising external capital
- Led product from concept to acquisition serving 20+ buildings and 10,000+ users by validating market needs, developing MVP, and executing full deployment across residential properties
- Achieved 75% resident adoption within 90 days and reduced manager workload by 40% through intuitive UX design and automated workflows that translated complex operations into simple, scalable systems
- Designed business logic and internal tools that streamlined access control, resident communication, and fee collection, creating measurable value for HOAs, managers and residents

NEXTIA.MX **Mar 2017 – Oct 2018**
MOBILE & FRONT-END DEVELOPER MEXICO CITY, MX

- Developed and maintained iOS and Android apps used by over 50,000 users, ensuring feature parity, stability, and ongoing performance across platforms
- Built responsive web applications with React and JavaScript, improving load times by 40% through performance optimization, code splitting, and asset management
- Integrated REST APIs to sync data between front-end and back-end systems, reducing user-facing errors by 90% and improving system reliability
