SANTIAGO DANIEL CORONADO SROKA

+52 55 1627 3510 | **S.CORONADO.SROKA@GMAIL.COM** | CDMX, México

PROFESSIONAL SUMMARY

Business strategist and technology leader with 7+ years of experience building and scaling companies. Expert problem solver with a strong track record designing scalable systems and integrating Artificial Intelligence (AI) to remove scalability constraints and drive measurable business outcomes. Proven success growing revenue to $8M USD with a high-performance team of only 7 people, prioritizing automation to reduce human error and maximize profitability (top and bottom line). Ability to combine strategic thinking with financial management and operational excellence to deliver high-ROI, technology-enabled growth, taking full ownership from capital raising through successful exit.

PROFESSIONAL EXPERIENCE

ONLINE BASICS COMPANY **Feb 2020 – Nov 2025**

FOUNDER & COO MEXICO CITY, MX

Built and scaled a hyper-efficient e-commerce operation, reaching $8M USD in revenue by engineering proprietary internal tools to automate logistics, pricing, inventory management, and paid advertising operations.

- Scaled revenue beyond $8M USD with a 7-person team (>$1.1M revenue per employee), achieving superior revenue efficiency by automating 70% of manual workflows through AI-assisted processes and centralizing project management in a real-time asynchronous Notion system.
- Designed the architecture of a proprietary internal ERP using Google Apps Script, integrating Amazon and Mercado Libre APIs to enable real-time analytics and SKU-level performance visibility, enabling agile data-driven decision-making relative to larger competitors.
- Diagnosed and eliminated critical margin erosion by building an automated logic-gate pricing validator, preventing price changes that could generate negative or strategy-inconsistent margins.
- Secured liquidity and inventory expansion by negotiating credit lines exceeding $1M USD, applying disciplined capital allocation and liquidity management to optimize cash flow and inventory growth.
- Consolidated the supply chain by establishing high-level commercial relationships with logistics providers and distributors, securing strategic distribution partnerships with priority allocation.
- Built a culture of autonomy and senior ownership through one-on-one strategic coaching, aligning each team member with macro business objectives to accelerate decision-making.

EUGENIA.AI **Jul 2018 – Jan 2020**

FOUNDER & CEO MEXICO CITY, MX

Founded and scaled a bootstrapped SaaS residential management platform, taking it to sustained profitability prior to acquisition by reengineering the sales model and systematizing condominium community management.

- Led the company's successful exit, supporting valuation through intrinsic technology value, strong user retention metrics, and disciplined unit economics.
- Overcame sales resistance from building administrators by pivoting the go-to-market (GTM) strategy to target Homeowners Associations (HOAs), creating demand pull that forced administrator adoption, reaching 10 residential complexes with 10,000+ users.
- Designed and launched critical digital governance features, including QR-based access control and in-app voting, achieving platform adoption upwards of 75% within the first 90 days.
- Structured previously chaotic residential communication by designing a service ticketing system with multimedia support and admin-to-resident support chat, and implementing a shared-area reservation module, significantly reducing administrative friction.

NEXTIA.MX **Mar 2017 – Oct 2018**

MOBILE & FRONT-END DEVELOPER MEXICO CITY, MX

Delivered high-performance applications for a user base exceeding 50,000, rapidly adapting to evolving technical requirements.

- Improved application performance by refactoring legacy code and implementing API-based data synchronization, reducing user-reported errors by 90% and improving load times by 40%.
- Closed critical technical skill gaps by rapidly adopting Java, React, and Swift, ensuring feature parity between iOS and Android under tight timelines.

TECHNICAL SKILLS AND CORE COMPETENCES

- **Process Engineering, Strategy & Leadership:** Operational excellence, data-driven decision-making, agile MVP development, product-market fit iteration, high-performance team leadership, end-to-end execution, go-to-market strategy, B2B/B2C negotiation.
- **Technology:** JavaScript, TypeScript, Python, Node.js, React, Java, Swift, HTML/CSS, Google Apps Script, SQL, NoSQL, Git, REST APIs.
